Hi Chris,

I would like to respond on behalf of the Smallfield Flood Action Group with regard to the Atkins report and other documents attached to your message that relate to flooding matters.

The Flood Action group are aware of the work being undertaken by Atkins which is being led by Surrey CC in cooperation with other flood risk authorities including Tandridge DC.

We are supportive in principle of the Flood Alleviation Scheme and generally agree with the analysis in the Atkins report and the direction that the development of the flood alleviation proposal is taking.

As representatives of the residents in Burstow who are concerned about the flood risks, our contact and discussions with the flood risk authorities involved will continue and we will make contributions to the development of the Scheme.

Implementation of a Flood Alleviation Scheme is a priority for Smallfield and we hope this will be implemented in the very near future.

Regards,

Graham
